

CADD Drafter

Are you an experienced CADD Drafter looking for a new opportunity in the Architecture & Planning industry? We are currently seeking a talented individual to join our team as a CADD Drafter. In this role, you will work closely with architects and designers to create detailed drawings and models using computer-aided design and drafting software. Your attention to detail and strong technical skills will be essential in accurately translating conceptual designs into construction documents. If you have a passion for architectural drafting and a keen eye for precision, join us and bring your expertise to our collaborative and dynamic team.

Responsibilities

- Create and modify detailed drawings and models using CADD software. -
- Collaborate with architects and designers to ensure accurate translation of conceptual designs into construction documents. -
- Assist in the preparation of technical specifications and construction estimates. -
- Review drawings and models for accuracy and completeness. -
- Coordinate with project engineers and consultants to incorporate necessary changes or modifications. -
- Maintain clear and organized documentation of all drawings and models. -
- Keep up-to-date with industry trends and advancements in CADD technology.

Requirements

- Bachelor's degree in architecture, engineering, or a related field. -
- Proven experience as a CADD Drafter in an architecture or engineering firm. -
- Proficiency in AutoCAD and other related CADD software. -
- Strong understanding of architectural and engineering principles. -
- Excellent communication and collaboration skills. -

- Ability to work effectively under tight deadlines and manage multiple projects simultaneously. -
- Attention to detail and strong organizational skills. -
- Knowledge of building codes and regulations.
